## A REALLY MEDICAL MONDAY

Science and medicine were the focus of the day this Monday as we welcomed the team from Medical Mavericks into school. In what proved to be a truly hands-on and action-packed day, students had the chance to explore the kinds of careers that Science can help prepare them for, learn about the incredible range of roles available in the NHS as well as get a brilliant insight into the ways the human body works. From trying their hand at keyhole surgery to exploring the inner workings of the human eye, our students got to grips with an amazing array of real-life medical marvels—great levels of curiosity, tenacity and hard work shown by all! Happy half term everyone!

## SCHOOL BUILD UPDATE

The build is underway. In the coming weeks and months we will be sharing photo updates here and on Twitter, so keep yourself up to date by following us @SuthersSchool. We've got a snap here which gives a glimpse of the work that has started on the foundations.
